I am a Software Developer and Master of Computer Applications (MCA) candidate with a strong foundation in full-stack web development and a keen interest in Generative AI. With hands-on experience spanning React and TypeScript frontend applications to Python, Java, and SQL databases, I enjoy designing responsive interfaces and building efficient APIs. I am always eager to learn, tackle challenging technical problems, and collaborate to create high-quality, impactful software.

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

Python, Java, JavaScript, TypeScript, SQL

BACKEND & DATABASES

Node.js, RESTful APIs, Express.js, MySQL, PostgreSQL, MongoDB

TOOLS & METHODOLOGIES

Unreal Engine, Git, GitHub, Agile/Scrum, Unit Testing, Debugging, SDLC

FRONTEND DEVELOPMENT

React, Vite, HTML5, CSS3, Responsive Design

AI & MACHINE LEARNING

Generative AI, LLMs, Computer Vision, OpenCV, Prompt Engineering, NLP

CORE CONCEPTS

Data Structures, Algorithms, Object-Oriented Programming (OOP), Problem Solving

PROFESSIONAL EXPERIENCE

Part-Time Intern — AI and Software Development

2025 – Present

Envision Infotech, Mysuru

- Developed and maintained software applications using Python and modern web technologies, contributing to client-facing product features in an Agile/Scrum environment.
- Collaborated with cross-functional teams to design, implement, and test RESTful APIs, ensuring seamless integration between frontend and backend services.
- Built and integrated Generative AI features leveraging Large Language Models (LLMs) for intelligent automation, improving workflow efficiency by an estimated 30%.
- Participated in code reviews, debugging sessions, and unit testing to ensure code quality and adherence to software development best practices.
- Utilized Git and GitHub for version control, managing feature branches and pull requests across collaborative development workflows.

PROJECTS

Deception-Driven Multimodal AI Scam Detection & Adversarial Engagement System

2026

Python Machine Learning NLP REST APIs TF-IDF Pattern Normalization

- Developed a defensive and offensive AI platform analyzing incoming SMS, email, and API messaging metadata, achieving a 92% classification accuracy in identifying scam attempts.
- Designed natural language processing pipelines using TF-IDF feature extraction, tokenization, stop-word removal, and URL pattern normalization.
- Engineered an automated deception-driven response engine that engages detected scammers in randomized, AI-generated dialogue to waste adversarial resources and analyze behavioral patterns.

AI-Enhanced Driver Training Simulator

2025

Unreal Engine Python Computer Vision OpenCV Machine Learning Real-Time Analytics

- Developed a realistic, game-like simulation interface in Unreal Engine integrated with Python backend services to train and evaluate driver behaviors in virtual environments.
- Implemented computer vision pipelines using OpenCV and machine learning algorithms to track driver eye gaze, posture, and facial expressions in real-time, achieving 90%+ classification accuracy.
- Engineered real-time telemetry and data analytics to assess driver performance, generating live visual scorecards for key safety metrics.

Smart Gaming Using IoT and Affective Computing

2024

Python

IoT Sensors

Affective Computing

Machine Learning

Real-Time Processing

- Built a smart gaming system integrating IoT devices and affective computing algorithms to dynamically adapt gameplay based on real-time user emotion detection.
- Designed and implemented data processing pipelines to handle sensor data streams, improving user engagement by 25% through adaptive game difficulty.
- Applied machine learning techniques for emotion classification using sensor input data.

EDUCATION

2024 – 2026

Master of Computer Applications

JSS Science and Technology University

CGPA: 8.2 (Till 2nd Sem)

Relevant Coursework: Data Structures, Algorithms, DBMS, Software Engineering, Operating Systems

2021 – 2024

Bachelor of Computer Applications

Amrita Vishwa Vidyapeetham

CGPA: 7.98

Relevant Coursework: OOP (Object-Oriented Programming), Database Management Systems, Web Development

2019 – 2021

Pre-University Course (PCMC)

Jnanodaya PU College

Score: 86.1%

CERTIFICATIONS

- Google Data Analytics Certificate (Coursera)
- Salesforce Development (ExcelR)
- Android Application Development (Udemy)
- 2D Game Development (Udemy)
- Data Analytics and Visualization (Swayam)

LANGUAGES

English (Proficient)

Kannada (Native)

Hindi (Proficient)
